TRIO 14

LOA: 14' (4.15m)
Beam: 3'6" (1.07m)
Nested size:
5'4" x 3'6"
(1.6 x 1.07m)
Capacity: 3 adults

NESTAWAY
Boats that fit

**TRIO
14**

Stacked together, the three nesting sections of the Nestaway **TRIO 14** fit into many estate cars (see examples right) - no need for a trailer, or awkward handling on/off a roof rack. Each section can be carried to the water individually, so you don't need a slipway to launch; at home she will store in the corner of a shed or garage.

She is essentially a "square-stern canoe", but her extra beam, flatter aft sections and built-in buoyancy make her much more capable than most craft of this type. Experienced boaters often comment "she's a lot more stable than I thought". Her efficient hull is very easily driven, whether you choose to paddle, row, motor, or sail. The Trio 14 is well-suited to near-silent electric motors - great for watching wildlife and trolling for fish - or she can plane at 11-12 knots with a 3.5hp petrol outboard on the back.

The hull is made from glassfibre with Teak or Iroko trim, total weight approx 140-lb (65kg).
Price from £3250 (basic boat to row/motor).
For options and **larger TRIO 16** see overleaf.

The three sections unbolt in moments (above); then nest inside each other (below).

TRIO 14 fits *INSIDE* many estate cars, for example:

Audi A6 Avant, 98-04

Volvo XC90 (also V70)

Renault Megane Tourer

Galaxy, Sharan, Alhambra

VW Transporter T4 Camper

Car not big enough? Try:

Middle on top - easy - bow and stern inside (Jag X-type)

Or fits in a 6x4ft Box Trailer - useful even without the boat!

Optional 44sqft lugsail rig, with side-mount leeboard keels

"Her easily-driven hull hit 12 knots powered by a 3.5hp outboard, and she felt stable and safe under way. There's plenty of room for passengers and gear... she can be sailed too."
PRACTICAL BOAT OWNER

"Such fun on the Thames... we went for a motor/row and picnic on the bank... bliss... she handled like a dream" **I. M., Oxford**

Trio 14' Pricing

(Standard Boat from £3250)

Rowing Package £3600 (SAVE £314)

Standard Boat plus: upgrade to teak woodwork, brass keel band, teak bilge keels, pair of chrome rowlocks and 6ft varnished oars.

Motor Packages from £4100

Rowing Package plus outboard bracket and:

- Tohatsu 3.5hp £4100 (SAVE £447)

- Torqeedo 1003S £4,850 (SAVE £558)

Sailing Package Silver £4900 (SAVE £534)

As Rowing Package plus outboard bracket and 44sqft balanced lugsail rig.

Sailing Package Gold £5750 (SAVE £731)

As Sailing Package Silver plus: teak deck thwarts; teak decked buoyancy tanks; three folding cleats; dark colour hull, cream inside; window & reef in sail, two-piece mast.

Trio 14 Standard Specification

White glassfibre hull with white glassfibre buoyancy tanks and grey flowcoated interior. Thwarts, knees & gunwhales in oiled iroko. Stainless steel towing eye.

Individual Option Prices (to add, when not included in chosen package)

COLOUR OPTIONS. Hull in navy, burgundy or dark green £75; interior in cream £30.

TRIM OPTIONS. Outboard bracket £45; upgrade to teak gunwhales & thwarts (in lieu of iroko) £230; add teak decking to buoyancy tank tops £475; teak deck style thwarts (in lieu of solid) £150; keel wear strip in brass £160; mid-section bilge keels in teak £120; rubber fendering to gunwhales £225; 3x folding cleats fitted to larger knees £150

SAILING RIG. 44sqft Balanced Lug sail, wooden spars, leeboards, rudder, rigging etc) £1475.

Add two-piece mast £95; window & set of reef points in sail £72.

OR buy boat "Rig Ready" (leeboard & mast mounts only) £210; add reef later if required.

OTHER: Pair of rowlocks fitted (mid section) and varnished oars £154; towbar mount carrying platform £375; spare joining bolts & washers pack £36. Lighter weight hull (painted, epoxy-infused carbon and woven glass, saves approx 20kg) add £1450.

TRIO 16

LOA: 16' (4.75m)

Beam: 4'6" (1.35m)

Nested size:

7' x 4'6" (2.1 x 1.35m)

Capacity: 4 adults +

NEW! NESTAWAY TRIO 16 Three-section Family-size Dayboat to Row, Sail or Motor

The Nestaway **TRIO 16** dismantles and nests into a package that is just 7ft long - shorter than the smallest "usefully-sized" single-piece boat. She has similar lines to our Trio 14, but the extra 2ft of length and 1ft of beam make a huge difference, giving her almost double the carrying capacity, and stability that surprises the owners of many larger craft.

She retains the 14's easily-driven nature and will plane with motors from about 6hp up - or can be pushed along at 5-6 knots, in near silence, with a 1kW electric outboard. With her optional 100sqft balanced lug rig she responds immediately to the slightest puff of wind. She is also easy to row for a boat of this size, from either or both of two positions.

Nested, she will fit inside many vans, or stow on larger yachts' decks, or could be towed on a trailer that's 9ft shorter than you 'd need for any other 16ft boat. That means easier to store - back home the whole lot can be stood on end - cheaper on ferries, and more practical to park.

Made from glassfibre with Teak trim, total weight about 260-lb (120kg). Price from around £6000 (row/motor version), depending on spec.

Nested length is just 7ft!

"A 16ft multi-purpose craft that can be rowed, powered by a small outboard, or sailed with a balance lug rig before being dismantled into three pieces and taken home... convenient stowage and transport with the extra space, pace & stability that only comes with length."
